	A	PPROVAL	OF STATE	ENGINEER			
	This is to certify that I have ex	amined the foregoi	ng application,	and do hereby grant the same, subject to the			
follo	wing limitations and conditions:						
subject to the terms and conditions imposed in said Permit 29623 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.  This corrected permit is issued for the purpose of correcting the total annual duty from 146 million gallons annually as allowed under the original permit to 15 million gallons annually.  The issuance of this permit reduces the total annual duty allowed under Permit 29624 from 146 million gallons annually to 131 million gallons annually.  The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not							
to ex	cceed 0.75		cubic feet per	second, but not to exceed			
15 million gallons annually.							
	_						
Proo	f of commencement of work shall	be filed before		Filed-February 28, 1979			
Work must be prosecuted with reasonable diligence and be completed on or before							
Proo	f of completion of work shall be fi	iled before		Filed-April 10, 1980			
Appl	ication of water to beneficial use	shall be made on o	r before	February 19, 1981			
Proo	f of the application of water to b	peneficial use shall	oe filed on or	before March 19, 1981
